NN (L) Liquid EUR - A Cap EUR

ISIN: LU0147323579

A sub-fund (hereafter referred to as the fund) of NN (L) Liquid

This fund is managed by NN Investment Partners Luxembourg S.A.

Objectives and Investment Policy

This short-term money market fund seeks to provide investors with stable and low-risk returns. We aim to preserve the value of all capital invested and offer investors liquidity (the possibility to enter/leave the fund with the same day value). The fund invests in all types of money market instruments denominated in Euro like commercial paper, certificates of deposits, floating rate notes (notes with a variable interest rate), asset-backed securities (securities whose value and income payments are derived from and collateralized (or "backed") by assets), Treasury Bills, and bonds. We aim to beat the performance of the benchmark Euro Overnight Index Average

(Eonia). In order to provide the necessary liquidity we leave a minimum of cash on overnight deposits. Furthermore, we always make sure that a regular cash flow is obtained. We add value by forming a view on the evolution of interest rates, and acting on that view. In addition we selectively take positions in attractively priced credit instruments. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 1 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past

performances and future potential evolution of the markets, associated with financial instruments used to reach the investment objective is considered low. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is low. The fund's liquidity risk is set to low. Liquidity risks arise when a specific underlying investment is difficult to sell, causing possible difficulty to redeem your investment from the fund. No guarantee is provided as to the recovery of your initial investment.
